

# EAS POLICIES

1. **Representation of EAS.** No member shall represent the corporation in an official capacity, nor make any financial obligations on behalf of the corporation, without prior approval of the Board of Directors.
2. **Sanctioned Events.** No events shall be considered as sponsored or sanctioned by EAS unless authorized in advance by the Board of Directors or the EAS Star Party Coordinator.
3. **Mail List.** While EAS provides the General email list as a service to the astronomy community, it does not assume any responsibility for the content of messages posted by individuals. Readers shall assume the risk of any advice or recommendations posted on the General email list.
4. **Observing Sites.** EAS has no observing sites which it recommends. Individual EAS members may have observing sites which they recommend, but EAS does not sponsor or sanction the use of any such sites. The use of such sites is at the user's own risk, and EAS assumes no liability.
5. **Laser Pointers.** No one should point any type of laser pointer at a human or in any direction where there is the possibility of human presence. Laser pointers should only be used judiciously when pointing at a benign target, after making 100% certain it is safe. The Eugene Astronomical Society does not condone or support the use of any laser type pointers at any of its events or functions. Anyone who uses a laser pointing device takes full responsibility for its use and does so at their own risk and liability.
